Web Developer

Profile

I love shipping great stuff and learning new things. I've been a full time professional developer since May 2016. Currently focusing on web apps and sites using React, node.js, Next.js, WordPress, Strapi, Sanity, etc. I started out working primarily in front end but have been moving steadily into full stack development. I value design, performance and accessibility. I've done many accessibility retrofits. Big fan of CSS and making clients happy!

Experience

Freelance Web Developer – January 2015 - Present
I provide JavaScript ecosystem, WordPress and other development services for design agencies, small businesses and marketing companies. I set up and maintain hosting on Vercel, Netlify, Render, Flywheel, WPEngine, Siteground, etc.

Full Stack Lead Web Developer (Contract), Sandbox, Sebastopol CA – July 2021 - Present
I architected, built and maintain a carbon impact calculator web app for the landscape design space. We are continually adding features. The app uses a headless JS stack: Next.js/Vercel - Strapi/Heroku; using MUI, Cloudinary, Stripe and AMCharts.

Lead Full Stack Web Developer, Flight LLC, Santa Rosa CA – March 2018 - December 2022
I built and maintained SMB and nonprofit web apps and websites in React/node.js, WordPress and Shopify. Flight LLC was a design-driven branding and development agency. I built custom themes/apps from mockups and modified existing themes. I set up and maintained hosting on various providers including Vercel, Heroku, cPanel (eg Siteground), and WPEngine.

Lead Web Developer, TIV Branding, Santa Rosa CA, May 2016 - January 2020
I built and maintained SMB websites on WordPress, Drupal and other technologies. All work used custom themes. TIV hosts ~200 SMB sites on CentOS (linux) running on Rackspace / Plesk. I built custom themes start to finish from Photoshop mockups and performed fast-turnaround updates and maintenance to WordPress and Drupal sites. I also worked on Shopify, Craft CMS and Rails sites.

Education

A.S. Electronic Technology, Santa Rosa Junior College
